

# FIRST DATA/STAR ROADSHOW

The Nebraska Credit Union League/Cooperative Solutions Group is excited to host a **FREE** Roadshow highlighting our newest Strategic Business Partner -- STAR.

We firmly believe that STAR is well positioned to help Nebraska credit unions by:

- maximizing network value - maintaining as much interchange revenue permitted by regulation
- reducing fraud

Why credit unions should consider STAR...

1. STAR is the first nationwide independent debit network allowing credit unions to compete on a national level for transactions.
2. STAR's competitive pricing and transparent fee structure allows credit unions to grow revenue while reducing expenses, growing the bottom line.
3. STAR provides innovative, market leading fraud solutions that protect credit unions.
4. STAR is uniquely positioned to offer a viable network alternative to Visa and MasterCard.
5. STAR invests on behalf of their members. STAR was the first independent network to support Apple Pay and now includes Android Pay and Samsung Pay.

Please join us to learn how STAR is poised to help your credit union compete in the changing payments industry. This session will provide a ground floor opportunity for credit unions to maintain a competitive edge.
